

SENIOR HEALTH TECHNOLOGY ASSESSMENT MANAGER

AXIS Healthcare Consulting Ltd was founded in Ireland in 2012 to provide high quality and tailored Pricing, Reimbursement and Access (PRA) services to clients. The Company's head office is located in Dublin and a second office is located in Galway city.

AXIS is now the largest Market Access and HEOR Consultancy in Ireland and the recognised leader within the international and national marketplace for its insights, expertise and success having delivered 75+ high quality and customised submissions to the Irish authorities.

The Company is now seeking to expand its team of technical specialists and wishes to appoint a **Senior Health Technology Assessment (HTA) Manager**.

The main responsibilities of the role include the development of robust, comprehensive and compelling submissions to various HTA agencies, model adaptations and completion of systematic literature reviews.

Job Type: Full time, Permanent position.

Location: Dublin or Galway office with home working options also available.

Salary: A competitive salary along with an annual company bonus, company pension scheme and a generous annual leave package are available to the right candidate. We also offer ongoing personal and professional development as well as other benefits including attendance at conferences and opportunities to publish research.

Role and Responsibilities

The successful candidate will:

- source local data to recalibrate economic and budget impact models used for submissions to NCPE and SMC.
- analyse and interpret scientific data for use in various reports and HTA dossiers.

Address: AXIS Consulting ,19-22, Lower Baggot Street, Dublin 2, D02 X658, Ireland

Office: +353 1 5292768

Email: INFO@axisconsulting.ie

Web: www.axisconsulting.ie

- adapt a variety of cost effectiveness models including Markov cohort models and partitioned survival models for submissions to HTA bodies.
- develop comprehensive HTA dossiers narrating the clinical value proposition and detailing the findings of all cost utility and budget impact analysis conducted.
- liaise with Clients regarding timely, high quality project deliverables.
- train and mentor junior members of the AXIS team.

Essential

- PhD or MSc in Health Economics, Statistics, Epidemiology or a related discipline.
- Prior HTA Management experience (1+year min.) in consultancy, Pharma industry or related.
- Direct experience of developing HTAs to agencies such as the NCPE, SMC or similar.
- Knowledge of HTA methodologies and processes.
- Experience of reviewing clinical and health economic data across a variety of therapeutic areas.
- Experience of navigating through the Irish HTA assessment process.
- Ability to manage multiple priorities in a fast-paced environment.
- Experience in Project Management.
- Excellent communication (both written and verbal) skills and proven ability to communicate technical information to both technical and non-technical staff/clients.
- Willingness to learn, an ability to work autonomously with a problem-solving approach.
- Excellent work ethic and integrity.
- Knowledge of the English language as mother-tongue, both verbal and written.

Highly Desirable

- Strong analytical skills.
- A high level of self-organisation and self-motivation.
- People Management experience.
- An up to date and thorough understanding of the Irish and UK healthcare industry and market access activities.

Please apply by sending a letter of application and a CV to brenda@axisconsulting.ie by August 7th 2020.
