

PART TIME STATISTICIAN / BIOSTATISTICIAN

AXIS Healthcare Consulting Ltd was founded in Ireland in 2012 to provide high quality, tailored Pricing, Reimbursement and Market Access (PRMA) Services to our clients. The Company's head office is located in Dublin and a second office is located in Galway.

AXIS has become Ireland's largest Market Access and HEOR Consultancy and has established a leadership position within the international and national marketplace for its insights, expertise and success having delivered 75+ high quality, customised submissions to the Irish authorities.

The company is now seeking to expand its team of technical specialists and wishes to appoint a **Statistician / Biostatistician** to join the Irish Team. The main responsibilities of the role are detailed below.

Job Type: Part time, flexible hours, permanent position.

Location: Dublin or Galway office with home working options also available.

Salary: A highly competitive salary, annual company bonus and a company pension scheme are available to the right candidate. We also offer ongoing personal and professional development as well as other benefits including attendance at conferences and opportunities to publish research.

Role and Responsibilities

The successful candidate will be responsible for:

- Statistical input on a variety of health economic and costing studies and projects.
- Development of models to support various projects using Excel, VBA and R.
- Model Validation.
- Providing broad support for model adaptations including structural modifications to Markov and Partitioned survival models.
- Analysing and interpreting scientific data to be used in reports and HTA submissions.
- Effective Project and client management.
- Training / mentoring junior members of the team.

Address: AXIS Consulting ,19-22, Lower Baggot Street, Dublin 2, D02 X658, Ireland
